Services

- Web Design
- Web Development
- iBeacon
- Custom Web Development
- IOS

Web Design

Your website is your face to the world and the source of first impressions to all potential new clients. It is the first level of interaction that will create an everlasting impression on the target and non-targeted audience. A great website will bring more traffic and more potential customers to your website. We believe that web design is both an art and a science and our designing team aims to convert your imagination into reality.

We want to spend time with you to fully understand your vision and build a website that speaks to your target audience and provides a great user experience regardless of the browser or device your guest chooses. All of this requires a significant portfolio of skills and we immodestly consider ourselves experts in the following disciples and technologies:

- Web Design
- App Design
- Logo Design
- Branding
- HTML5
- CSS3
- Media Queries
- Usability
- Responsive

Web Development

We are a custom web development company that focuses on enabling you to overcome several logistical and technological challenges without breaking the bank. Technology has evolved to where it is easy to build a basic website and the price will be tempting but Designing a website to consistently deliver your message, reinforce your brand, compel the visitor to actually and make them glad that they visited is not a job for those early in their career. You need to find a developer who has significant experience working in this industry and that can offer you solutions that efficiently scale with you as your business grows and expands. This requires the development team to have significant knowledge of and experience with these technologies and coding

Mean Stack

- Node.Js
- Angular.Js
- MongoDB

MERN Stack

- ReactJs
- React Native
- MongoDB

PHP

- Core PHP
- Codeigniter
- Laravel
- Wordpress
- Magento

iBeacon

EXPECTATIONS TO REALITY

- Beacon is a perfect doorway for businesses to advertise to their customers. A virtual perimeter is set by our mobile app developers for sending signals to the customers that lie within that perimeter. It is ideal for small perimeter areas like factories, hospitals, campuses, and business spaces.

Custom Web Development

We provide custom web development and programming services that meet the requirements of the industry as well as our clients. We make sure to use the latest technologies, programming languages, and industry trends that will help your business reach great heights of success. We believe in advancing in technology as per the market trends and which are more effective and reduce time and money of the client.

(1). We believe in keeping aware of the constantly changing web improvement changes is becoming quite challenging for some. While a portion of the progressions are impermanent and brief, a considerable lot of the others have an emotional change winning the ideas.

(2). While conventional web developers may see themselves escaping design, the up-and-coming patterns in web advancement will positively get another transformation. The accompanying patterns merit our consideration and how they are going to change the substance of conventional website compositions.

Mobile Native app

- Mobile apps are not just for scrolling and viewing content, there’s much more to them. The latest technologies like Machine learning, Artificial Intelligence have taken over all aspects of life in a small phone. We make apps using native and Hybrid technologies which are leading in the industry, and aim at reducing the cost and developing apps with more effectiveness. We aim to build robust solutions for your business that not only solve real-life problems.
- You will be well-served by hiring a company that uses well-structured Android and iOS app development processes and methods. Our latest coding guidelines and programming practices and standards keep you ahead of your peers in the industry.

Mobile Hybrid app

Ionic Services

- Ionic is an open-source framework for building cross-platform mobile and web applications using web technologies like HTML, CSS, and JavaScript/TypeScript. It provides a set of UI components, libraries, and tools that simplify the development process, making it faster and more cost-effective to create beautiful, native-like apps.

React JS Services

- React Plugin Development
- React Web Development
- React Interactive UI Development
- Mobile App Development
- Migrating jQuery /JavaScript to ReactJS
- Using reactJS / React Native with NodeJS
- Migrating native apps to react Native Platform
